

EMPOWER YOUR STUDENTS

The CISR High School Program

This innovative insurance CTE certification program will help your students create the future they need and deserve. This program offers an entry into the growing insurance and risk industry and will open a career path for interested students who successfully complete the program and pass the exams, earning the foundational Certified Insurance Service Representative (CISR) designation.

WHAT IS THE CISR CERTIFICATION?

An individual with a CISR designation has completed a rigorous instructional program to become a highly trained Certified Insurance Service Representative. The designation provides front-line insurance professionals with the skills required to analyze risks, policies, forms, and claims data. With advanced knowledge and communication abilities, individuals holding the CISR designation have a competitive edge in the job market.

FOUNDATIONS OF THE PROGRAM

The National Alliance's CISR High School Program is a digital classroom experience based on the Texas Essential Knowledge and Skills (TEKS) state standards and the highly respected CISR curriculum. The program is on the 2019–2020 Texas Approved List for CTE.

OFFERING THE PROGRAM

CTE Directors and Business/Finance teachers, take notice! Because all the materials required for student success are provided, class facilitation requires no special training or certification. Facilitators/instructors access each course and additional resources through an online Learning Management System (LMS) established and maintained by The National Alliance. Exams reside and are delivered through the LMS.

A REWARDING FUTURE

For over 33 years, the CISR designation has afforded insurance professionals a significant advantage in the workforce. The CISR High School Program trains students to analyze insurance risks, policies, forms, and claims data, giving them a significant advantage upon entering the workforce.

WHAT IS PROVIDED?

- Lesson Plans
- Formative and Summative Assessments
- Video Lectures
- Digital Books
- Study Guides
- Practice Exercises and Self-Quizzes
- Online Access to Experts
- Curriculum Maps for the Semesters

SCHOOL BENEFITS

- 2020-2021 Approved List of Industry-Based Certifications
- Aligned with the Texas Essential Knowledge and Skills (TEKS), College & Career Readiness Standards (CCMR), and the industry-based standards of the CISR High School Program
- CTE weighted funding with program pricing tailored for every campus and district
- Improves your A-F accountability, every student receives CCMR points upon completion
- No special training required for CTE certified teachers, however, is provided as part of the program

TEACHER BENEFITS

- Industry training and CISR credentialing for teachers through The National Alliance
- Complete industry created curriculum: course materials, lesson plans, study guides, pre-tests and certification exams included
- Easy-to-use Learning Management System
- Total program support including industry professionals, professional curriculum writer, IT help desk, CTE program specialist on staff

STUDENT BENEFITS

- Internships and real-world opportunities
- Internationally recognized designation/stackable credentials
- Potential college credit at 29 University Associate Programs
- Participation in post-secondary and industry-sponsored events and activities
- Scholarship and entry-level employment opportunities available through internships and industry based CTSO sponsored competitive events

This program connects our students to the workforce through industry-driven curriculum and overwhelming support from local insurance professionals; a great opportunity for students to enter the industry by learning needed skills, developing relationships with mentors, and participating in internships that will set them on the path to success!
